THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U.S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

1. In February and March 1951 Yugoslav infantry regiments received a supply of the new RB bazooka (Rucni Reaktivni Bacac "RB"). Artillery regiment sections also are to be equipped with one each. The new weapon, which is of Yugoslav manufacture, replaces the old type which is being taken out of use and stored in warehouses.
2. The new bazooka is being manufactured in the Kragujevac and Sarajevo arsenals. It employs two types of projectile: the delayed-action and the armor-piercing type which weigh, respectively, 3 kilograms and  $\frac{1}{2}$  kilograms. The delayed-action projectile has a range of 200 meters, and the armor-piercing type attains 500 meters. The latter type can perforate 18 mm. of steel armor or 2 meters of cement. The propelling charge weighs 200 grams. The projectile and the charge are inserted in the muzzle.
3. The charge is detonated by a magazine, containing six primers, which is placed in a special slot. The RB bazooka has a minimum recoil since half the gas escapes through the breech while the other half is discharged in flight.
4. Two men are assigned to each bazooka: one carries it while the other acts as gunner. It may be fired from the shoulder or from a tripod on the ground, and is equipped with a muzzle sight.
5. In the course of tests carried out at Kraljevica, the results were not considered satisfactory inasmuch as the infantry officers who fired the bazookas were not very adept in handling and aiming them.

25X1

1. During 1950 and until May 1951, the Yugoslavs worked on the fortification of, and the preparation of artillery emplacements on, the western tip of the Island of Premuda (Attachment I hereto), facing the Island of Kamenjak. To do the work, approximately 120 marines were carefully selected for their political reliability among elements residing far from the Island.
2. Three workshifts of eight hours each were organized. The men worked at a fast pace and their few hours of liberty were often taken up by conferences and meetings. The marines were quartered in four wooden barracks near the Church of Sveti Krjak on the southern end of the Island. The material was brought in from Split and was unloaded in the small port of Sveti Krjak.
3. Work on the fortifications was under the management of a certain Lieutenant Torbuk. The role of political commissar was filled by a certain Warrant Officer Mijatovic, and there were two adjutants, one of whom was 2nd Lt. Dusan Supljikanac.
4. Excavations were made in the rock of the hill for passageways; quarters for officers and men; munitions dumps; a food and clothing stockroom; a room for the officer on duty; an observation tower; emplacements for machine guns and a searchlight; an electric generator; and a water tank (Attachments II and III hereto).
5. The entrance to the fortification is located on the northern side of the Island and is protected by a steel door. The main corridor is semi-circular (Attachment II, number 1, and Attachment III, number 1) and is 2 meters high and 1.80 meters wide. The interior has been plastered. The last 30 meters of the passageway (Attachment II, number 2) rise slightly and end up in the open where an emplacement for an artillery piece, pointing east-southeast, has been set up in the aperture (Attachment II, number 8\*).

- 2 -

6. Three identical corridors (Attachment II, numbers 2, and Attachment III, numbers 2), at a distance of 50 or 60 meters from each other, branch out from the right of the main corridor. At the end of each of the corridors, which rise at a 50-degree angle towards the open, there is an emplacement for a gun (Attachment II, numbers 8, and Attachment III, number 8).
7. The quarters for troops consist of four small rooms (Attachment II, numbers 3). Each chief gunner and his gun squad are assigned to one room. The rooms are 10 meters long, 5 meters wide and 3 meters high. Each room has two steel doors, in and out, which are 1.20 meters wide and 2 meters high. The officers' quarters (Attachment II, number 4), the stockroom (Attachment II, number 5) and the kitchen (Attachment II, number 6) are of the same size and type as the troops' quarters.
8. Four munitions dumps, one to service each gun, are located to one side of the passageways leading to the gun emplacements (Attachment II, numbers 7). Each dump is 5 meters long, 4 meters wide and 3 meters high, and has two steel doors, one for entry and one for exit.
9. One upgraded passageway begins at the officers' quarters. It is 10 meters long, 1 meter wide and 1.90 meters high (Attachment II, number 9, and Attachment III, number 9). The passageway leads to the room of the officer on duty (Attachment II, number 10, and Attachment III, number 10), which is of the same proportions as the other quarters. Another upgraded passageway (Attachment II, number 11, and Attachment III, number 11) starts at this point and runs for 10 meters to a water tank about 20 meters high and 1.50 meters in diameter (Attachment III, diagonal lines and number 12).
10. The observation post (Attachment II, number 12, and Attachment III, number 12), which is on top of the water tank, can be reached by the water tank's ladder. It is formed by a platform 2.50 meters square, 2 meters above the tank. The platform rises 50 centimeters above the surface of the ground and is well camouflaged. The post is equipped with a porthole for observation.
11. Each gun is set on a cement base of circular shape 3 meters in diameter and between 6 and 7 meters deep (Attachment IV). Each emplacement has a protecting wall in reinforced concrete which is 1.50 meters high and 2 meters wide. Each has an embrasure which permits a 120-degree range in horizontal aiming and an elevation of 70 degrees. The gun mount is 1.20 meters high and is bolted to the base.
12. The coastal guns are of 75-mm. caliber with a range of 13 kilometers. Although largely dug up while the work was in progress, the hill has been so carefully camouflaged with underbrush that it seems to be absolutely devoid of fortifications.
13. Approximately 200 meters to the right (looking from the sea) of the entrance to the fortifications, a cavern was excavated in the rock for a searchlight mounted on rails (Attachment II, number 13).
14. Emplacements for Breda heavy machine guns are located as follows:
  - a. One (Attachment II, number 14) is approximately 100 meters to the right (looking from the sea) of the observation post (Attachment II, number 12); and
  - b. Another is about 30 meters above the searchlight.These emplacements consist of cement bases measuring 4x4x3 meters.

THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSES OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U.S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

1. Headquarters Division (unidentified), located in a three-story building which is situated in the center of Zajecar south of the municipal park:
  - a. Commander: Colonel Ivan Babin; and
  - b. Commander of the Artillery Group (Divizion): Major Petar Tisma.

2. 115 Artillery Regiment:
- a. Commander: An unidentified major;
- b. Political Commissar: An unidentified major; and
- c. Chief Quartermaster: An unidentified captain.

The Regiment has 600 men and 100 horses, and consists of a battery command and two groups equipped with ZIS-3 guns of 75-mm. caliber, and 105-mm. German howitzers. All equipment is horsedrawn.

3. 28 Protiv Tenkovski Samostalni Divizion (28 Autonomous Antitank Artillery Group):

The Group is composed of a command; a company command; and three batteries:

- a. Command:
- |                                 |  |
|---------------------------------|--|
| (1) Commander:                  | Captain Nikola Stojakovic;               |
| (2) Political Commissar:        | Captain Dusan Pecanac;                   |
| (3) Deputy Political Commissar: | Captain Ante Dukovic;                    |
| (4) Adjutant:                   | An unidentified captain;                 |
| (5) Chief Quartermaster:        | An unidentified captain; and             |
| (6) Clerks:                     | A noncommissioned officer and a soldier. |

- b. Company Command:
- (1) Commander: An unidentified warrant officer;

- (2) Attached: 4 noncommissioned officers: 1 for transportation; 1 for communications; 1 for medical service; and 1 for supply; 6 communications men; 3 medical men; and 1 driver; and
- (3) Equipment: 3 Soviet wireless sets and 1 Dodge truck.

c. 1 Battery:

- (1) Commander: Lieutenant Milorad Lazarevic;  
 (2) Commander of 1 Section: 2nd Lt. Bosko Jovicic;  
 (3) Commander of 2 Section: Unidentified;  
 (4) Gun Commanders: 4 noncommissioned officers;  
 (5) Transport Commander: 1 noncommissioned officer;  
 (6) Troops: 32 soldiers, of whom 4 are drivers; and  
 (7) Equipment: 4 trucks and 4 ZIS-3 75-mm. guns on rubber wheels.

d. 2 Battery:

- (1) Commander: Captain Ante Dukovic; and  
 (2) Staff and Equipment: Identical with that of 1 Battery.

e. 3 Battery:

- (1) Commander: Lieutenant Savo Baketic; and  
 (2) Staff and Equipment: Identical with that of 1 Battery.

25X1

4.  in case of the outbreak of hostilities, the Group would assume the following positions:

- a. 1 Battery at R. Uglja, along the Bujkov River;  
 b. 2 Battery to protect the crossroads north of Zajecar; and  
 c. 3 Battery to act as a reserve battery.

The gun platforms for 1 and 2 Batteries have been completed and are in the open, approximately 500 meters from each other. The platforms for 3 Battery are camouflaged.

5. Engineer Battalion:

- a. Commander: An unidentified captain; and  
 b. Strength: 150 men.

The Battalion specializes in the laying and clearing of land mines. It has a supply of Soviet, German and British mines. A bridge-construction squad is also attached to the Battalion.

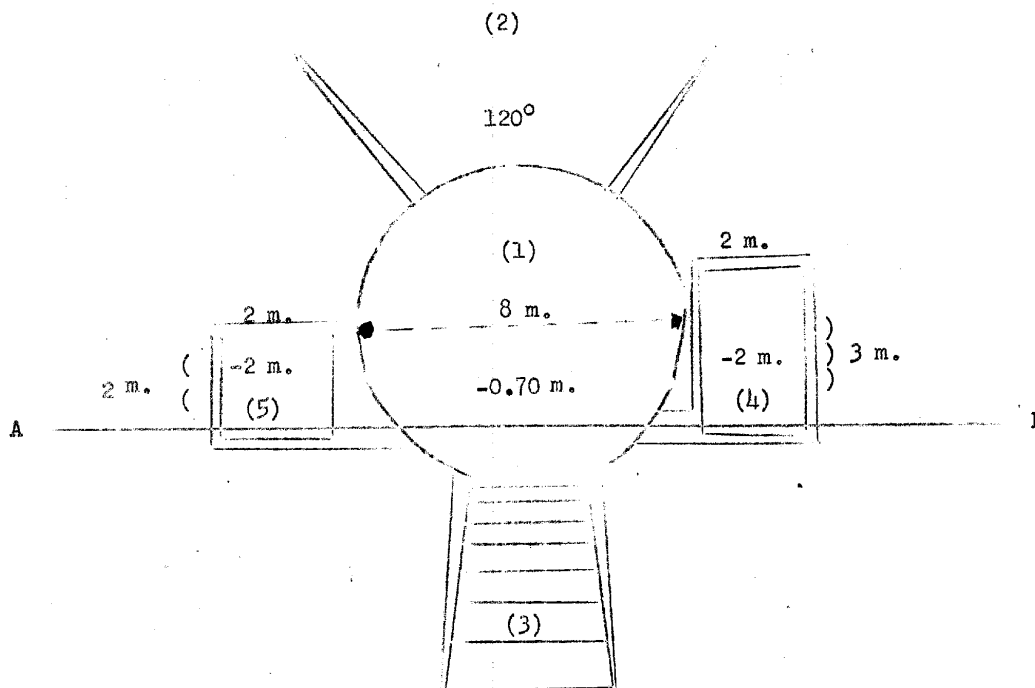

6. 2 Infantry Regiment is quartered in four cement pavilions, of which two have two stories and two have one story. They are located south of Zajecar on the road to Grljan. Regiment strength is approximately 3000.
7. Communications Company is quartered on the ground floor of two small units north of the road to Lubnica.
8. Chemical Warfare Company is located on the ground floor of two units north of the road to Lubnica.
9. Frontier Regiment, formerly located at Knjazevac, is now located in the vicinity of the copper mine at Bor. One battalion of the Regiment is at an unknown location.
10. Clothing Supply Warehouse consists of two wood barracks.
11. Food Supply Warehouse consists of four wood barracks.
12. Attached hereto are sketches showing the disposition of the above units and describing the open gun platform of 2 Battery of 28 Autonomous Antitank Artillery Group.

THIS IS UNEVALUATED INFORMATION

1. The Port Cigale zone, which lies west of the city of Mali Losinj on the Island of Losinj, Yugoslavia, has been declared a military zone. Two coastal batteries of unspecified caliber are situated at the two points which mark the entrance to the port. In the immediate vicinity of each battery there are two wood barracks for the gun crews.
2. Fortifications in rock are located northwest of the town of Mali Losinj. They are entered from the side of the Losinj Canal and, because of this, it was necessary to modify the course of the main highway which now flanks the sea in the northern sector.
3. The permanent bridge over the Canal has been demolished and replaced by a drawbridge in order to permit navigation of the Canal.
4. Two antiaircraft guns are located on the hill known as Veliki Tovar. In an old fort nearby there is an observation post. Immediately south of the observation post there is a searchlight and, 100 meters south of it, there is an unfortified bunker.
5. On the hill known as Mali Tovar, which is south of Veliki Tovar, there is another unfortified bunker. Wood barracks and underground munitions storage chambers are located between the hills of Mali Tovar and Veliki Tovar.
6. Until May 1951, the 531 Marine Battalion was quartered in the barracks.

DATE DISTR. 9 April 1952

NO. OF PAGES 1

NO. OF ENCLS.  
(LISTED BELOW)

SUPPLEMENT TO  
REPORT NO.

25X1

DO NOT CIRCULATE

THIS IS UNEVALUATED INFORMATION

1. The 531 Marine Infantry Battalion is billeted in newly constructed barracks around Artatore Bay, Losinj Island. Prior to being transferred to this region, the 531 Marine Infantry Battalion was located in the area of Veliki Tovar and Mali Tovar. The officers of the 531 Marine Infantry Battalion have been identified as:
  - a. Commander: Captain Ciro Sevo;
  - b. Political Commissar: Captain Ljubo Simunic; and
  - c. Deputy Political Commissar: Captain Radomir Cepic.
2. The 531 Marine Infantry Battalion is composed of the following units:
  - a. Three rifle companies, equipped with Ereda and Soviet PPSH heavy machine guns;
  - b. One cannon and mortar company, equipped with 6x81 mm. mortars;
  - c. An antitank unit, equipped with three German bazookas and six British rifles;
  - d. A communications platoon, equipped with two radio sets;
  - e. A machine gun platoon; and
  - f. A quartermaster unit.
3. Inasmuch as the 531 Marine Infantry Battalion is called upon to furnish men for the erection of fortifications in the area, the Battalion generally operates with a minimum force of men. Night and day alarms are held by the Battalion twice monthly. During such drills, the men of the Battalion assume posts assigned to them along the coast of Losinj, west of the highway.
